Statistical Reasoning – Online Learning

Contact Information:

Email: amber.brattebo@cobbk12.org

Remind: Text 81010; @alg2brat

Students can text me directly using remind. I will be available for response on Remind during school hours (8:20-3:30).

Blog: www.mrsbrattebo.weebly.com

Student Expectations:

The most important thing for your student to do every single day is to check my blog for assignments and up to date information. Online learning has been extended to at least April 24th. Students will be responsible for the material from Unit 5: Sampling and Unit 4: Linear Regression.

- Students will be required to complete 2 assignments a week. They will be given 2 days to work on 1 assignment/lesson.

Students are welcomed to print and complete these assignments. Students without a printer may write all assignments on notebook paper. Students do not need to write down every question, just answer each question on a separate sheet.

- Students will be assigned a skills check through Quizizz. Students will need to create an account to use this program. These checks will be composed of the same questions that are on their weekly assignments. Students should use their assignments when completing these checks. They will only have 1 attempt to complete the skills check. Information on recovering failed skills checks will be provided soon.

It is important that your student follows the scheduled days listed on the blog in order to stay on track and avoid being overwhelmed with material.

Grading:

Tests/Quizzes: Tests will not be given through the online learning platform.

Daily Grade: Students will be required to turn in all online learning assignments at the completion of the unit. More information on how to turn in assignments will be provided by Wednesday, April 1st.

Tutoring Options:

- Monday – Thursday are virtual learning days. I am available for tutoring based on the following schedule.

  9:00 – 10:00 First Block
  10:30 - 11:30 Second Block

From administration: If your teacher posts videos for you to watch, then this will be the time to reach out and ask questions of your teacher since we are taking the 10:30 to 12:00 office hours away. On Fridays, our teachers will be working with their teams planning as well as providing support for any student who is behind or does not understand what is being done.

** Students can text me directly using remind. I will be available for response on Remind during school hours (8:20-3:30).
Recovery:

Students who are currently failing might have concerns on how they can make up their grades during this time. Please remember that this class may be a requirement for graduation for some. **All test recovery will be put on hold for now (more info forth coming).** Students may always work on any past daily grade assignment that they are missing. These assignments are specified in their gradebook. Students may do all work on a separate sheet of paper if it cannot be printed. Students have been shown many times in class how to find these missing assignments on my blog. **All recovery assignments may be emailed to me and I will update grades accordingly.**
